Professional Summary

Results-driven Engineering Manager and Systems Architect with 17+ years of progressive leadership experience, guiding cross-functional development teams of up to 11 engineers through complex cloud migrations, enterprise modernization, and AI-driven product initiatives. Proven track record of translating business objectives into scalable technical roadmaps, establishing Agile delivery cultures, and integrating **AI Agents** and **LLM-powered automation** to accelerate developer productivity and product quality. Deep expertise in **Microsoft Azure**, cloud-native architecture, big data pipelines, and full-stack engineering. Equally comfortable at the whiteboard defining strategy and in code reviews driving technical excellence.

Work Experience (Recent Years)

Development Manager | Roga Partners | BekTek Inc. | SmartLinx Solutions

Jan 2025 – Today

- Lead, mentor, and coach a **11-engineer** squad, owning hiring, performance reviews, and career-development roadmaps; introduced **Agile** rituals, **pair-programming**, and structured **mentoring** plans for junior hires.
- Migrate an existing on-prem *monolith* **web**-app to a distributed monolith sitting in **Microsoft Azure** through dedicated **cloud architecture**, utilizing native **Azure SaaS** and **PaaS** tools, with **.NET Core C#** and **React**.
- Provided a fully containerized ecosystem (**Docker**) deployed independently under **Azure Container Apps**.
- Orchestrate **CI/CD** pipeline from **GitHub** repositories to **Microsoft Azure** using **GitHub Actions**
- Helm a **big data** solution for existing **OLTP** databases on **Azure SQL** to **Snowflake OLAP** using **OneLake** (over Microsoft Fabric) and **Apache Iceberg**
- **ETL & ELT** ingestion-based processes using **Azure Data Factory (ADF)**
- Championed the adoption of **AI Agents** across the development workflow, integrating **LLM-powered coding agents** (**GitHub Copilot**, **Claude Code**) to automate code reviews, test generation, and documentation, reducing manual overhead and improving sprint velocity.

Systems Architect and Senior Developer | PRA Group

2011 – Dec 2024

- Lead a project for company employees focused on searching and retrieving customer account documents, including a **Web API** for integrating new document types or retrieving documents from specialized applications, using **.NET 8.0** under **Windows**.
- Design, Developed and deployed software with **Azure DevOps** and **GitHub**.

- Led a Business-to-Business (**B2B**) development project enabling the download and upload of reports between businesses, built on **.NET 8.0** and **Microsoft Azure** cloud services.
- Modernized systems by transitioning to **Microservices** with **gRPC**, **Protocol Buffers**, and **.NET 8.0**, resulting in a significant improvement in system efficiency and reliability.

Server-Side Team Lead | Secure Islands Technologies

2009 - 2011

- Managed a **Data Loss Prevention (DLP)** security product, including **Business Intelligence** solutions for large organizations on **Microsoft SSAS**
- **Led a 4-member development team** using **Agile-Scrum** methodology.
- Developed and defined the system in **.NET 4.0**, utilizing **WPF**, **WCF Services**, and **SQL Server 2008**, to streamline security processes and improve customer service.

Development Manager | Ness Technologies

2009

- Led a development project for the Ministry of Housing, **managing a team of 8**, including **4** developers, **2** system analysts, and **2** QA personnel, aiming to enhance the organizational information system.
- Designed and implemented solutions with **.NET 3.5**, **BizTalk**, and **SQL Server**, which contributed to greater organizational efficiency.

Team Leader | AnyClip (formerly PopTalk)

2007 - 2009

- Managed a development team of **9**, leading the development of a **Desktop Application** and projects on the **company's website**, with an emphasis on integrations with social networks like **Facebook**.
- Led the development of various services using **WPF**, **ASP.NET MVC**, and **JavaScript**, leading to increased user satisfaction and expanded application usage.

Personal Skills

- **Interpersonal Communication:** Excellent interpersonal skills and high-quality teamwork.
- **Autodidact and Independent:** Strong self-learning ability and attention to detail.
- **Efficient Time Management:** Consistently meets required timelines and targets.
- **High Work Ethic:** Commitment and reliability.

Technical Skills

- **Programming Languages:** C++, C#, .NET (Framework, Core & NET), Python
- **Cloud Platforms:** Microsoft Azure
- **Databases:** SQL Server, Oracle, OLTP, OLAP, Delta Tables, NoSQL (Mongo/Cosmos)
- **Secure Development:** PCI-DSS standard
- **AI & Agentic Frameworks:** Claude Code, Windsurf, GitHub Copilot, LLM-powered agents, Prompt Engineering

- **Leadership & Management:** Team Building, Hiring, Performance Management, Technical Roadmapping, Agile/Scrum

Education

- **Languages:** Hebrew (native), English (native level reading and writing)
- **Software Technician Degree** – Amal B, Petah Tikva
- **Open University:** Computer Science & Software Design

Military Service

Full service, Home Front Command, Communications and Computer Department

- Completed a course on operation and maintenance of communications networks and systems based on NetWare 3.11/12 (1994)
- Complementary Military Reserves & Veteran service in armor division for over 20 years
